EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Nikaido on August 22, 2006.

The application has been amended as follows:

In the abstract:

Detecting the deviation of the grinding wheel position from the amount of work deformation after grinding, and correctly adjusting the grinding wheel position, it provides both-side grinding techniques for making the work excellent in flatness and parallelism. When the feeding operation of grinding wheels (1,2) is completed, the distances from hydrostatic pads (20, 21) to the surface and back of work (W) are measured at three points, and the deformation amount of work (W) is detected from the results of measurement at the three points by using air gauge sensors (Sa, Sb, Sc), and in case the calculated amount of deformation exceeds the specified value, the moving adjustment of grinding wheels (1, 2) is performed in accordance with the amount of deformation so that work (W) is flat without deformation when the feeding operation of grinding wheels (1, 2) is completed.

3. The abstract has been amended to include everything disclosed in the originally filed two paragraph abstract and combine them into one paragraph, in accordance with the standard practices set forth in the MPEP§ 608.01(b). No words have changed or modified.

In the claims:

In claim 2, on page 3, line 2, **please insert** a period --. after the word "supported."

2. Claim 2 has been amended to correct an obvious punctuation error.
